VOLUME FALLING OFF

Speculation on New York 'Change Takes a Steadier Tone.

London Purchases Causes Improvement in the List-Indianapolis Cereals Steadily Dull.

At New York yesterday money on call was 1462 per cent., the last loan being at 11/2. closing offered at 11/2.

Prime mercantile paper, 51/2071/2 per cent. Sterling exchange firmer, with actual business in bankers' bills at \$4.83\464.83\6 for demand and \$4.80\\@4.80\% for sixty days; posted rates, \$4.81\\alpha 4.84\\alpha; commercial paper, \$4.79@4.791/2.

Silver certificates, 72@723/2. The total sales of stocks were 370,900 shares. The volume of business on the New York Stock Exchange yesterday was much less than for the previous three days, but the speculation was steadier and none the less strong. A new leader was selected for the dealings, St. Paul, an unusually heavy buying movement having been inaugurated therein. Some of the purchases were for the London account and were based on increased earnings and improved prospects of the company. New York & New England was also prominent. At the opening a higher range of quotations were established. About 1 o'clock a heavy tone came over the dealings from which they did not recover until

6 and Louisville & Nashville, 2%, The railway and miscellaneous bond market was strong in tone and fairly active, the chief advances being 5½ in Louisville, New Albany & Chicago, Michigan Central sevens and Chesapeake & Ohio fours-and-a-half, 2 Government bonds were strong and State bonds were dull. LOCAL GRAIN AND PRODUCE.

More Activity in Trade Circles with Few Changes in Values.

Yesterday was the most active day of the present week on the wholesale streets. Morning trains brought in a number of country merchants, and mail orders were better than for some days past. But it is still noticeable that retail merchants are buying only goods which are necessities for families from day to day, and on a very limited scale. Boot and shoe men report trade better, and dry goods houses are selling some goods, but far below the average October volume. Prices in dry goods are steady, but can hardly be said to be firm. Grocers report trade in leading staples fair, but not up to expectations, by any means. On Commission row business still drags, and the commission man who is now making expenses is very well satisfied. There is more complaint of late as regards

The local grain market is as near a standatill as it ever gets. Attendance on 'Change is slim, and bidding tame, with little variation in prices. Track bids yesterday ruled as follows:

Biggest Market of the Month in the Last Hour at Chicago.

The Leading Cereal Carried the Other Grains Up with It, and Provisions Also Made Gains.

CHICAGO, Oct. 27.-The biggest market of the month in wheat was during the last hour of the session to-day. There are surmises it was due to guesses that voting would begin this afternoon in the Senate. Rumors were also current that Northwestern receipts have begun to fall off. Wheat closed strong at an advance for the day of %c. Corn had to thank the strength in wheat for 4c advance. Oats and provisions likewise appeared to lean up against wheat for support, but both closed a little higher than on the day before. Wheat, at the opening, was about the same as yesterday's closing, followed by an easter feeling, and prices declined about 1/2c, then became strong and advanced 1/2c, eased off a trifle, held steady, and the closing was within 1/4c of the top. The market was partly influenced by the firmer cables. There is a large shortage in the market, and the firmness induced rather free covering. New York parties were reported as large buyers. The receipts in the Northwest hold up pretty well, and some advices state that the movement is likely to continue two or three weeks more at about present figures. But the arrivals to-day at Minneapolis and Duluth were only about 70 per cent. of the receipts of a year ago. It was also reported that gold imports would start in again, and \$500,000 was reported to be shipped from Liverpool to New York to-

Trading in corn was light. The market was influenced chiefly by the firmness in wheat. Opinion is very much divided as to the amount of old corn back in the country, but leans to the side of small reserves. Fluctuations were confined to ½c range. The close was ½c from the top figures. Oats were very dull. The range was %c, and the close near the top, with a net gain

Provisions started rather weak at some decline from vesterday's closing prices on account of the hog receipts having overrun the estimate by 4,000 head. They recovered on the receipt of a few scattering buying orders and in sympathy with the firmness of the grain markets. The last bulge in wheat was taken advantage of to unload some early purchases, and the closing prices were not quite the highest of the day. Compared with last night Jonuary pork is up 20c, January lard, .021/2c and January ribs, .05c. Vessel rates steady at 2c for wheat and \$4c for corn to Buffalo. Estimated recelpts to-morrow are: Wheat, 93 cars; corn, 380 cars; oats, 185 cars; hogs, 14,000 head.

THE DITCHED BRIGADIERS. A Busy Country Has Wearled of Their Bloviating Humbug. Chicago Times (Dem.)

Is there, outside of rhetoric, a last ditch? Do there exist, save in figures of speech, fearful and bloody men who perish in that We heard some revival recently from Southern brigadiers in the Senate of the United States of their purpose to do marvelous things rather than assent for a moment to the proposition of the Democratic party announced last June that the "cowardly makeshift" should be repealed. Within forty-eight hours Mr. Harris, who was re-cently declaring that the Vice President of the United States would never be permitted arbitrarily to order the calling of the roll on the present matter because he would be killed if he tried it, was saying that he would "see the universe sunk in eternal perdition" before he would permit the "infamous measure"-that is, a measure for the repeal of what the Democratic convention of last June called a "cowardly makeshift"-to pass the Senate. Another last ditcher, one of those thrasonical brigadiers of whom we heard so much during the war and from whom we have heard so much since, Senator Pugh declared that he would die in his tracks before he would abandon an inch of the position he had taken, a position opposed to the Democratic party. Another bloviating humbug, who thirty years ago was all the time dying rhetorically in the last ditch and has survived to enjoy his monthly voucher from the treasury of the United States, Senator

The George breath seems to have given If the country has wearied of these ancient hum jugs, blatant and boastful talkers, who seem to know nothing of the gentus of the Republic which survived despite their efforts to destroy it, it is small wonder. The fellows belong to a past age. A generation which is all business and cares nothing for rhetorica? cant has no patience with the grandiose charlatans that are forever willing to die in the last ditch but forever postponing the discovery of the precise location of the ultimate excava-

George, of Mississippi, was proposing with-

in forty-eight hours to fight the Demo-cratic measure for repeal of the "cowardly

makeshift" "as long as breath lasted.

Value of the Colored People.

To the Editor of the Indianapolis Journal:

Please allow me space in your paper to

offer a few thoughts for the consideration of your colored readers. I would say to them that our last city election was a great victory in a two-fold sense. It was in common a victory for all for law and order against lawlessness and disorder, and it was a great victory for the grand old party that took the yoke of bondage off of our necks and enlightened our minds so we can understand what is just and what is unjust, both morally and financially. Now. the negro as a slave was worth so much to his master that when he was refused the right to enter certain territories with his slave as property it caused a division of the white men in this country. Now, we will notice briefly what they were worth according to the estimate put upon them by their owners about 1856, when the United States Supreme Court was considering Judge Scott's case against the slave-holders, who were trying to get the territory North to work their slaves in, Judge Catron, of Tennessee, told what they were worth. Read report 5, page 527, in which he said, among other things, that if they were deprived of taking their slaves into the territory, the slaves at that time being considered a part of his family, the estimated loss would reach a thousand million dollars. Judge Catron at that time was judge of the Eighth district, which included Kentucky, Tennessee and Missouri. Accepting this es-timate as correct, running from 1857 to 1803, it would be nearly five times that amount, and upon that basis it would give I leave this even for any correction that any one is | en, Miss Lottie; Long, Albert; Ingraable to make upon it, this claim to be made ham, H. L. upon the slave-holders and their posterity or heirs. We never expect to get it, but we would have them know that we know what is just, and this piece of history should be handed down to the coming generation in indelible letters that they might read and learn. I am now an old man. nearly eighty-four years of age, but I shall always remember the mark of the Republican party from 1861 to 1865. PETER W. H. JOHNSON. Indianapolis Oct. 27.

MORE HOPEFUL VIEW

Dun & Co.'s Weekly Review Holds Out a Rosy Promise.

Reports from the Industrial Field, However, Show Very Little Improvement-Failures, 352.

NEW YORK, Oct. 27 .- R. G. Dun & Co.'s

weekly review of trade says: Port is in sight after a long and stormy voyage, and the prospect of a speedy end of the struggle over repeal has brought bright hopes to business. It is too soon to expect much effect in trade and manufactures, and though monetary obstacles are to a large extent removed, there still remain other legislative questions which create uncertainty. A fact of real encouragement is that railway earnings for the third week of October show an increase of 3 per cent. over last year, the first increase for a long time. Wheat rose 2c, although Atlantic exports fell to 1,100,000 bushels for the week, against 1,900,000 bushels last year, in part because Western receipts were but 5,863,000 bushels against 8,900,000 bushels last year. But corn declined 1/4c, with better reports of yields, coffee declined 3-16c, pork products made only slight gains, and cotton fell 4c, receipts being 60,000 bales greater than last year. As yet there is seen only a continuance of the faint and slow increase in distribution of products which have been noticed for some weeks. Nor does this gradual revival in demand extend to all branches. Most of the increase yet seen in cotton and shoe manufacture may be explained by mere exhaustion in stocks of dealers, as frequent requests for immediate delivery show, but there is also reported a somewhat better demand for consumers, and four more cotton mills have started, and seven increased forces, against seven stopping or decreasing. A similar demand has increased by six the number of hosiery and knit goods works reported in operation. The shipment of shoes from the East in four weeks of October are 28 per cent less than last year, against 32 per cent. in September, but against eight comparatively small woolen mills starting, five have stopped, including one of 3,000 and another of 1,000 hands. The total sales of wool at three chief markets, including several million pounds believed to be for speculation, have been 9,273,371 pounds in three weeks, against 21,975,000

last vear. Twenty-two additional iron furnaces have gone into blast, and the present output may be a little larger than at the beginning of the month. Some rail mills have resumed manufacture, apparently to provide for future rather than present wants of their customers, and there is some addition to the number of nail and wire works and machine shops employed. But the demand for most products is small. Steel billets are called firmer at \$50, and bar sells with decreasing demand for \$135 at Chicago. It is hoped that monetary ease and security may encourage railroad extensions and improvements and more architectural work, but the shrinkage in demand is not wholly due to the state of the money markets. The number and magnitude of failures creased less than had been expected, the liabilities in three weeks of October amounting to \$15,072,920, against \$7,000,000 for the same week last year. This week there have been 352 failures in the United States, against 187 last year, and forty-four in Canada, against twenty last year. Including one bank and two Western failures for a million or more, there were sixty-five es liabilities exceeding \$5,000 each.
